

2021 Award for Excellence in environmental, health, safety and security

Ashland Columbus **Atlas Street Facility** Columbus, Ohio

Ashland's Atlas Street Facility's safety committee organized a safety standdown focused on learning and team building, formed small cross-functional teams and inspected the entire facility as a "Find It, Fix It" exercise to find potential hazards. Over 100 different items were discovered, and employees improved housekeeping, replaced worn out hoses, improved labeling, evaluated walking and working surfaces, and created work orders to fix other safety issues. All issues were resolved over the following year.

The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 17 facilities from around Ohio, all of which had significant contributions and achievements in 2020.
