

2021 Award for Excellence in environmental, health, safety and security

BASF Corporation

Whitehouse, Ohio

The COVID pandemic created challenges for the BASF Whitehouse site. The COVID Response Team worked diligently to understand what was needed to prepare the site so employees could return to work safely. The team developed a Whitehouse Site Start-up Playbook that captured action items, disinfection schedule, supplies, screening processes, PPE, site entry plan, schedules, training, etc. The team executed the playbook preparing the site for returning to work with confidence as needed approvals were granted.

The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 17 facilities from around Ohio, all of which had significant contributions and achievements in 2020.
