

2021 Award for Excellence in environmental, health, safety and security

DuPont Inc.

West Alexandria, Ohio

In 2020, The DuPont West Alexandria, OH facility achieved, for the 2nd consecutive year, ZERO OSHA recordable injuries, process safety incidents, and reportable spills. A team of operators, engineers, and mechanics implemented a new solids addition system. This closed-loop system separates the operators from potential process hazards and improves the ergonomics of powder additions. This is one example of how improved health and safety performance is incorporated into everyday work processes.

The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 17 facilities from around Ohio, all of which had significant contributions and achievements in 2020.
