

2021 Award for Excellence in environmental, health, safety and security

GFS Chemicals

Columbus, Ohio

GFS Chemicals is a privately held chemical company with three profit center divisions located in and around Columbus, Ohio. When a new business opportunity arose, GFS Chemicals' team members recognized an opportunity to improve safety protocols and mitigate risk through the development of a special mechanical apparatus used in the bottling of uniquely hazardous chemicals. This project was successful in significantly reducing potential employee exposure.

The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 17 facilities from around Ohio, all of which had significant contributions and achievements in 2020.
