

2021 Award for Excellence in environmental, health, safety and security

The Lubrizol Corporation Brecksville, Ohio

In 2020, Lubrizol Brecksville completed an initiative to mitigate Working at Heights (WAH) risks across the site. This was a joint effort among site management, HSES, project managers and maintenance from Lubrizol and our embedded Facilities contractor. Some of the projects included were the installation of guardrails and other fall protection on building roofs, the purchase of two personnel lifts, installation of a safety pivot gate on a mezzanine, and implementation of a WAH written program.

The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 17 facilities from around Ohio, all of which had significant contributions and achievements in 2020.
