

2021 Award for Excellence in environmental, health, safety and security

Univar Solutions

Dublin, Ohio

Being serious about safety is part of Univar Solutions' core values and drives the company's commitment to being the safest distributor of chemicals and ingredients in the world. The company's Dublin facility is a major chemical ingredient distribution hub and one of more than 100 U.S. facilities that helped the company achieve excellence in chemical release prevention through consistent execution of a rigorous safety management system. In fact, the facility achieved a remarkable result in less than two years: reduction of accidental chemical releases over 200 pounds by 500%.

The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 17 facilities from around Ohio, all of which had significant contributions and achievements in 2020.
