

2021 Award for Excellence in environmental, health, safety and security

The Lubrizol Corporation Painesville, Ohio

Lubrizol's Painesville plant responded to a process safety incident at a sister plant by developing a flammable storage tank safety standard. This standard significantly reduces the risk of a fire or explosion when storing and transferring flammable materials. Painesville, identified, evaluated and tabulated flammable storage tanks, ranking them from highest to lowest risk. Capital projects are being executed based on risk ranking.

The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 17 facilities from around Ohio, all of which had significant contributions and achievements in 2020.
