

## **2022 Award for Excellence** in environmental, health, safety and security

### **BASF Corporation** **Whitehouse, Ohio**

The BASF Whitehouse site had been experiencing issues with water flow to site safety showers and eye wash stations as the water loop had significant fouling periodically restricting flow. In addition, the water supply did not consistently meet the OSHA water temperature guideline. The flow issues and water temperature variation justified the installation of a tempered water loop system. The total project cost was \$70,269.
