

2022 Award for Excellence in environmental, health, safety and security

Dupont Inc. **Valley View, Ohio**

The Valley View & Stow Works sites work under an integrated leadership and operations team to manufacture Vespel® parts and shapes for use in high temperature/wear applications in the aerospace and industrial sectors. 2021 was a big year for the sites; in March, the sites marked both the 29th consecutive year without a lost workday case and the 4th consecutive year injury-free overall. New, employee-driven safety teams were also formed to further improve upon their safety-centric culture. Even during a pandemic, the Valley View & Stow Works sites continued to uphold their commitment to zero injuries, occupational illnesses, and environmental incidents, holding fast to the belief that all incidents are preventable.

The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 24 facilities from around Ohio, all of which had significant contributions and achievements in 2021.
