

2022 Award for Excellence in environmental, health, safety and security

PPG **Barberton, Ohio**

The Barberton facility's ergonomic program consists of a committee of all levels of positions within the plant. One of the tasks identified in an area was the result of a significant ergonomic injury due to handling of bags of raw material in their Teslin department. These ergonomic stressors for those tasks resulted in the purchase of a material lifting device. Positive feedback from operators was given, and to date no ergonomic stressors or concerns have been identified since.

The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 24 facilities from around Ohio, all of which had significant contributions and achievements in 2021.
