

## **2022 Award for Excellence** in environmental, health, safety and security

### **PPG** **Cleveland, Ohio**

Using a continuous improvement event (kaizen), PPG Cleveland created a work process and software tool that allows the site to recycle leftover paint at the end of batches, store them, and repurpose them as a raw material for the next batch. This simple process prevented 191,607 gallons of paint from getting sent out of our plant as waste in 2021.

*The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 24 facilities from around Ohio, all of which had significant contributions and achievements in 2021.*
