

2022 Award for Excellence in environmental, health, safety and security

PPG **Cleveland, Ohio**

PPG Cleveland installed an overfill protection system for bulk material unloading (Building 90) and distribution to 24 tanks located in Building 16 to significantly mitigate the risk associated with remote unloading and transfer to resin tanks. The site also added thermal monitoring and protection for 15 pumps rated (and protected) for use in hazardous areas with individual hardwire safety interlock circuits for each pump to reduce safety hazards inherent to the older system.

The Ohio Chemistry Technology Council recently announced the recipients of their Annual Awards for Excellence which recognizes Ohio chemical companies who have demonstrated exceptional performance in environmental, health, safety and security over the previous year. Awards were presented to 24 facilities from around Ohio, all of which had significant contributions and achievements in 2021.
