

Cenovus Lima Refinery – Lima, Ohio

In 2021, Cenovus Lima Refinery was at 0.42 recordable injury rate; just below the refining OSHA recordable injury rate of 0.5. In 2022, Cenovus Lima Refinery set a priority for a recordable injury rate of 0.22 and ended the year with a recordable injury rate of 0.10, a record for the site and world-class performance. The site achieved this by being intentional in their discussion of occupational safety and personal accountability, improved field visits, and opportunities for employees to address root causes of occupational safety hazards.
