

## **Emery Oleochemicals LLC – Cincinnati, Ohio**

In 2022 Emery completed a complete shutdown of the electrical grid for the first time in 40 years. The main station and 30 substations were inspected/overhauled and over 50 steam/condensate projects completed. Challenges to these projects included: over 200 contractors onsite, around the clock work, maintaining fire systems, alternative emergency communications/parking and security procedures. The entire project spanning 10 days was completed successfully and with no injuries or incidents.
