

Epsilyte LLC – Piqua, Ohio

Epsilyte LLC began 2022 with several recordable injuries and determined to take progressive steps to eliminate injuries at its newly acquired site. SafeStartNOW® was chosen for this purpose and involves 4 modules with 2 hours of classroom training for each module. After each module, there is 1 month period where the employees can put their learnings into practice. All employees have completed 2 modules and the site has not had an injury in 8 straight months. SafeStartNOW® crosses the boundaries of site safety and is a program used to strengthen family safety as well including a take-home portion for the teen-age and younger children to encourage them to start the journey to a safe and healthy lifestyle. Epsilyte knows safety starts at home and is brought to work every day and is partnering with their employees to maintain a zero-injury workplace.
