

McGean – Cleveland, Ohio

In 2022, McGean installed display tv's in both of their main production areas and maintenance shop. These tv's have a rolling slideshow of different safety items they feel are needed to be seen daily. The slides are changed on a frequent basis based on different hot topics that come up in a safety chat, safety training, or safety committee meeting and also used to update employees regarding contractors that are on site. The main goal of the tv is to show that McGean cares about employee safety.
